

# AH-300-K-1-2x3

pH sensor

- Higher flow rate
- KCl-Seitenarm

AH-300-K-1-2x3

## Applications

**Cooling And Boiler  
Feed Water**

**Process Water**

## Description

The Kuntze AH-300-K-1-2x3 is a combination electrode for pH-measurement with 3 ceramic junction. The sensor is particularly suitable for media with low conductivities.

# AH-300-K-1-2x3

pH sensor

## Technical data

### Measuring parameter

pH-value 0.00.. 14.00 pH

### Mechanical construction

Junction	3 x ceramic
Shaft material	Glass
Electrode material	AH glass
Reference system	Ag/AgCl/ KCl 3M
Internal buffer	pH 7
Mechanical connection	S7 plug
Electrical connection	2 pole screw connection

## Mechanical drawing
