

AH-300-K-1-3

pH sensor

- KCl hose connection
- Higher flow rate

AH-300-K-1-3

Applications

Waste Water Treatment

Process Water

**Cooling And Boiler
Feed Water**

Description

The AH-300-K-1-3 is a combination electrode for pH-measurement with platinum wire junction. The sensor is particularly suitable for media with low conductivities.

AH-300-K-1-3

pH sensor

Technical data

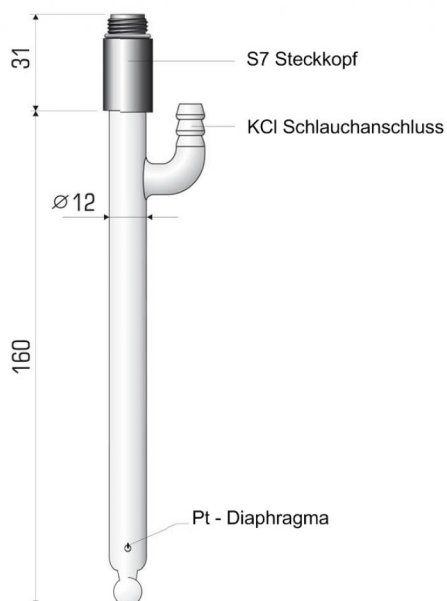

Measuring parameter

pH-value 0.00.. 14.00 pH

Mechanical construction

Junction	Platinum
Shaft material	Glass
Electrode material	AH-glass
Reference system	Ag/AgCl/KCl 3M
Mechanical connection	S7 plug
Electrical connection	2 pole screw connection

Mechanical drawing

AH-300-K-1-3

pH sensor

Storage version

Article number	Name	Description
24132050K	AH-300-K-1-3	pH sensor: KCl liquid filled, Pt junction, 160 mm, S7 plug
