

## **COMPACT HIGH-PERFORMANCE FAN HEATER**

## CR 030 | 950 W

> Compact design > Double insulated > Integrated thermostat or hygrostat

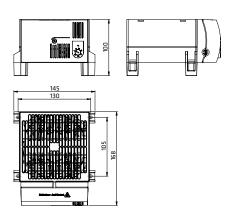

The compact high performance fan heater prevents formation of condensation and frost and provides an evenly distributed interior air temperature in enclosures with electric/electronic components. The plastic housing provides double insulation and acts as protection against contact. The fan heater is available with integrated thermostat or pre-set hygrostat for temperature or humidity control. The CR 030 was designed as a stationary unit for the bottom of the enclosure. For wall fixing the fan heater CR 130 is recommended.
